WORK EXPERIENCE

[18/04/2022 – Current]

Senior Software Engineer

Astro (PT Astro Technologies Indonesia)

City: Jakarta | **Country:** Indonesia

As a senior software engineer in order team, I am responsible in development of some core features in order module such as : GrabMart integration, super delivery order, Astro kitchen CS order creation, Astro balance top up, order pooling peak time configuration, order V2, mix cart, and additional SLA in every phase of development from technical design, development, code review, testing, deployment, and monitoring.

[03/01/2022 – 18/04/2022]

Senior Technical Consultant

Verint Systems Inc (PT Ciboodle Indonesia)

City: Jakarta | **Country:** Indonesia

As a senior technical consultant for EMPro cloud services, I was responsible in mainly setting up business configuration and portals as a part of solutions to be delivered for specific client using company's tools and framework.

[29/06/2020 – 31/12/2021]

Software Engineer

Lemonilo (PT Lemonilo Indonesia Sehat)

City: Jakarta | **Country:** Indonesia

As a software engineer in marketing and Lemonilo life team, I was responsible in designing, building, and maintains go based microservices related to marketing and Lemonilo life, deliver features that are essential for both teams such as referral program, health discussion forum, gamification, coupon validation rule revamp, etc.

[25/06/2018 – 01/04/2020]

Software Engineer

Airy (PT Airy Nest Indonesia)

City: Jakarta | **Country:** Indonesia

As a Full Stack Software Engineer on Core Team (Marketing Technology) until the company terminated its operation. I mainly focused on design, development and maintaining features, tools, and integrations using Java (Dropwizard framework) and Go to support the marketing team. I was also responsible in providing technical support for the marketing team in daily operations. I have handled multiple project such as : Transaction Attribution Report, Airy Click ID, Signature Promotion, Flash Sale, Airy Click ID Ads Data Migration, Customer Segmentation, etc.

[01/08/2016 – 22/06/2018]

Software Engineer

Tokopedia (PT Tokopedia)

As a Full Stack Software Engineer at Transaction Tribe (Order, Cart, and Checkout), I mainly worked on order service migration from monolith (using Perl) into microservices (using Go) and development of some order and cart features such as new checkout flow, and autodebit commission from official store.
